

The attached memo came to me today regarding your scheduled appearance before Representative Gore's Subcommittee on 29 March. The memo lists two areas of interest. The first is no stranger to you; the second OGC can probably help you with, if you wish to have some support.

Please let me know what you would like to have us pull together for you. The Executive Order referred to in the second point must be 12065.

The hearing will be open. If you need any more information, I will ask Joameto get back to the Subcommittee.

MEMORANDUM FOR:

SA/DCI

STAT

VIA: Chief, Legislative Liaison Division *W*
FROM: Legislative Liaison
SUBJECT: 29 March Open Hearing on Technology Transfer Before the Committee
on Science and Technology Subcommittee on Investigations
and Oversight

1. Jim Jensen, Representative Albert Gore's (D., TN) senior staffer on the Investigations and Oversight Subcommittee, has relayed the following information regarding Admiral Inman's appearance on 29 March.

2. The two salient points of interest are:

a) Admiral Inman's proposal presented before the American Association for the Advancement of Science, and;

b) the impact of the Executive Order on science and technology research both domestically and internationally.

*Not by
these witnesses*

3. The following individuals either have been or will be invited to appear as witnesses:

Frank Carlucci, Deputy Secretary of Defense;

Dr. Frank Press, National Academy of Science;

Dr. Robert Crell, University of New Hampshire;

Paul Graves, President of MIT;

William Perry, Former DoD Under Secretary for Research and Development;

Richard Leshner, Chamber of Commerce;

National Science Board Chairman Branscomb (also chief scientist for IBM); and either the,

President or Vice President of Stanford University

4. Representative Gore will chair this hearing with the assistance of Representative Douglas Walgren (D., PA), Chairman of the Science, Research, and Technology Subcommittee.

5. Please contact me if there are any questions.
